With Vista System, you get what is expected from a leading international sign manufacturer.

Availability of service through thousands of sign professionals worldwide.

MCFT - Modular Curved Frame Technology; A modular system with the ability to provide highly customisable solutions that meet the unique requirements of each sign project.

A modern, contemporary clean look.

Simple to use and easy to update by yourself.

Maximizing modularity with a wide range of sizes.

Comprehensive solution with an unrivalled range of applications that cover the entire project for a competitive price.

High quality, 100% guaranteed product.
We hope you will enjoy our new guidebook, and find it useful and convenient.

As you may have noticed, we often mention in our literature that we operate according to the U&I business method. The U&I method was developed by us with a specific goal and is our promise to the market.

We strive to continually provide an "Unbelievable & Incredible" experience to our clients with everything we do.

Sounds overstated? Well, we mean it! We realise that our customers expect their service to improve and not decline. We also understand that's exactly what gets us excited about being in business in the first place. The challenge of discovering just how far we can go to impress you, to excite and surprise you and to improve your well being as a result of doing business with us. Focusing on this goal requires our team to constantly work hard on improving, creating and generating new ideas as to how we can improve your well-being. This type of focus and purpose generates a positive atmosphere amongst our company and makes it a great place to be.

We invite you to join our excitement!
MCFT
Modular Curved Frame Technology

MCFT is a new concept in the sign industry. MCFT was developed by experienced sign professionals with a goal to fill the gap between bespoke sign systems and modular sign systems. MCFT offers the best of both worlds by providing the consumer with all the advantages of a modern modular system, while at the same time, providing a custom solution for the unique requirements of each project. The result, a modular system with a custom fabricated look and capabilities. MCFT offers flexibility when it comes to budgeting, by offering the ability to adjust the cost according to the level of customisation.

What makes an MCFT system?

Modular
Standard units that can be assembled in different ways using both standard and custom accessories and attachments.

Curved
Today’s design trend and a curved shape that keeps the insert material in place by using its own tension.

Frame
Enabling the use of many types of sign substrates and inserts providing for easy and inexpensive updating of the signs.

Technology
With MCFT, the sign-pro participates in the design and development of new ideas for new products and becomes an integral part of the development process jointly with Vista System by providing new ideas from the field that mirror market needs. These demands are supported by the quick fabrication capabilities of custom accessories and attachments that mesh with the system extrusions.

Custom Components and MCFT

1. Unique requirements
2. Joint development process
3. Supply specified products
4. Deliver market needs
Vista System Advantages

Sign frame:
Vista System was originally designed as a sign frame holder for a wide range of applications. This gives Vista System a huge advantage over other sign systems. The system is designed to handle most applications and materials used in the sign industry. This includes printed-paper, engraved, embossed, screen-printed substrates, photo-metal, photo-polymer, vinyl graphics, photo-luminescent safety signs, tactile, and more. The materials used include polymers and metals of all types, plastics, paper, etc. Any material with flexibility and the correct thickness may be used as an insert with Vista System frames.

Easy to adopt:
This means that Vista System is the easiest system for sign companies to adopt. There is no need to develop new technologies, but simply to incorporate existing technologies into the system.

A wide range of sizes:
Vista System is the only system featuring more than 80 different extrusions, creating unlimited widths and shapes. This is more than five times the number of widths offered by any other MCFT system currently available. This wide choice of sizes and shapes allows the customer to stick to one sign system throughout a project, and to find solutions to almost any kind of sign required.

Solutions and applications:
Vista System offers comprehensive solutions for suspended signs, flag signs, main directory signs, double sided pylons, triangle pylons, post signs, personal table signs, and many more. No other curved system can offer such a comprehensive solution.

End caps:
The metal end caps are made of aluminium with silver or black anodised finishes and includes stainless steel screws. The metal end caps are made of aluminium with silver or black anodise finishes and includes stainless steel screws.

Screw bosses for structural purposes:
Vista System offers a revolutionary solution for attaching and installing signs with no need for the welding and/or building of metal construction for support. A system of massive channels (Screw Bosses) for screws are inside the extrusion itself, enabling the construction of an enormous selection of elements, within minutes and with out any welding or special tools.

Separation strips:
Vista System offers an integrated system, which allows a sign to be divided into separate changeable slats within one sign.

Guarantee:
Vista System is sold only under the brand name “Vista”, only to the sign trade. Working this way assures sign makers that Vista System will not compete with them and that the project is done by professionals.
Wall Signs
Create wall-mounted signs with the Vista frame extrusions using any flat, flexible substrate to produce a curved-face sign.
Substrates:
Paper + lens, engraving plastics, thin metals, laminates.
Compatible methods:
Cut vinyl, digitally printed vinyl, engraving, screen-printing and Braille and tactile.

Extrusion assemblies:
Available from 30mm/1.18” to 1200mm/48” wide.
Plastic end caps: Grey or black, up to V300 excluding V11.
Metal end caps: Brushed silver or black from V60 and up.

For the System Components catalogue, visit our web site: www.vistasystem.com/Components.html
Vista Light Wall Signs

The Vista Light used with or without lighting, provides the option to sandwich the graphics between a white translucent diffuser and a clear matte lens, both made from vandal proof polycarbonate.

Vista System frames are a perfect solution for posters, and provide POP advertising with enhanced visibility and beauty, thanks to the curved design of the frames. The option of backlit or standard wall frames provides an endless variety of sizes to match any project.

Standard finishes for Vista profiles are available in silver or black anodise. Choose between black plastic end caps or silver and black anodised aluminium end caps finishes.

Custom sizes and finishes are available upon request.
Projecting Signs

The wall brackets are designed to accept standard size extrusions. The base is designed to mount on the wall using countersunk screws. The bracket fits onto the base and is secured with decorative nuts. Signs that project more than 100mm/4” into the path of travel, should be mounted at least 2M/80” from the floor. Choose between standard steel and deluxe aluminum brackets. Finish: Black powder coat.

Simple Base

The simple base style projecting frames are similar to small pylon signs designed to be mounted flush to the wall. They are attractively priced and provide a clean, streamlined appearance. The simple base design can also be used as an overhead sign mounted to the ceiling.

Vista Light Projecting Signs

The new projecting Vista Light signs can be internally illuminated or used with virtually any sign substrate without illumination. The Vista Light projecting frames are like small pylon signs. They are attractively priced and provide a clean, streamlined appearance and can also be used as an overhead sign mounted to the ceiling.

Standard finishes for Vista profiles are available in silver or black anodise. Choose between black plastic end caps or silver and black anodised aluminium finishes. Custom sizes and finishes are available upon request.
Directories

Vista System directories are fast, easy and simple to assemble and install. There is no need for special tools. The system has the advantage of flexibility to accept a variety of insert materials as well as the complete freedom to determine the height of each information strip, you decide how the sign will be sectioned by placing the separation strips as needed. Where? Wherever you decide, according to your design.

Directory assemblies are available up to V600 (24")
Plastic end caps: Grey or black, up to V300 excluding V11.
Metal end caps: Brushed silver or black anodise.
V14, V17 and V22 are not available with separation strips.

For the System Components catalogue, visit our website: www.vistasystem.com/Components.html
The Flush Mounted Multi-Panel Directory
This directory is a combination made of a number of basic directories previously mentioned and flush mounted frames, which are mounted in proximity to each other.

This attractive multi panel directory was created using individual inexpensive elements and clever artwork.

Dividing strips:
Vista System offers an integrated system, which allows a sign to be divided into separate changeable slats within a single sign. V14, V17 and V22 are not available with separation strips.
Directories
Vista System directory signs are easy to maintain and update. The advantages of this simple system are flexibility when it comes to the overall width of the sign and the ability to add additional panels. It offers a perfect choice, since its' innovative design allows for easy installation, removal and replacement of the signage, even by a novice. Vista’s wide-ranging system of contemporary curved framed technology is a key factor in the purchasing process.

Plastic end caps: Grey or black, up to V300 excluding V11.
Metal end caps: Brushed silver or black anodise, from V60.
Custom sizes, paint or anodise, are available.
Table Stands
The "Kangaroo" table sign frame is offered as a complete package:
- Convex frame, aluminium base and end cap, clear/tron-glare lens.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.
- Designed to accept standard paper or other sign substrates.

The Kangaroo sign frame offered in 10 different widths:
V60, V80, V100, V120, V150, V200, VA4, VLetter, V11, V300.

Standard finishes for Vista profiles and metal end caps are available in silver or black anodise.
Custom sizes and finishes are available upon request.
Table Stands
The "Boomerang" sign frame is offered as a complete package:
- Convex frame, end caps, clear/non-glare lenses.
- Available in several sizes.
- Easy to assemble.
- Easy to change insert.

Frames are offered in 10 different heights up to 2000. Standard finishes are available in silver or black anodize. Custom sizes and finishes are available upon request.

TS30
The TS30 is a three sided heavy table sign, offered as a complete package:
30mm/1.18” per side.
Plastic end caps are available in grey or black, supplied with three clear non-glare lenses.

The TS30 is available in clear or black anodize.
Double Sided Pylons
The system will accept a variety of standard inserts/substrates, including: paper, plastic, metal, laminates, sublimations, etc....
By adding Vista System divider strips, the towers can function as directories with changeable inserts.

Available in two basic designs:
The slim design is offered in 13 different widths from 150mm/6” to 600mm/24”, and can be ordered in various heights to accommodate a wide range of applications.
Bases are available for both permanent and portable applications.

Wide design - DSW
Slim design - DSS

Great for directories, show rooms, lobbies and displays in many environments, including car parks, airports, hospitals, office buildings, campuses, libraries and more!
Double Sided Pylons

Vista system offers a range of bases and end caps that utilise the built-in screw bases allowing all sign holders to be assembled using only a screwdriver. This feature of the system is used to create freestanding convex, double-sided signs to be used with standard sign substrates, without interior illumination.

A wide range of sizes can be fabricated by expanding the extrusions to fit the standard bases and end caps.

The wide design is offered in 19 different widths from 150mm/6” to 1200mm/48” and can be ordered in various heights to accommodate a wide range of applications. Bases are available for both permanent and portable applications.

Standard finishes for Vista profiles and metal end caps are available in silver or black anodise. Custom sizes and finishes are available upon request.
Suspended Signs

Vista System standard profiles and end caps are used with specially designed connectors that are also cable clamps, to create unending combinations of vertical and horizontal curved double-sided suspended signs.

Standard finishes for Vista profiles and metal end caps are available in silver or black anodise.

Custom sizes and finishes are available upon request.
Suspended Vista Light

The Vista Light series provides a great solution for suspended signs with or without internal illumination. The system is lightweight and available in a variety of sizes. Simply insert any flexible material between the extrusions.

The Vista Light system provides solutions for both horizontal and vertical curve configurations.

Standard finishes for Vista profiles are available in silver or black anodise. Choose between black plastic end caps or silver and black anodised aluminium. Custom sizes and finishes are available upon request.
Double Sided Post Signs

Vista’s stylish posts are shown supporting a double sided sign with side-by-side posts, all Vista sign holders accept any sign material that is flat and flexible.

Sign frames and base heights are adjustable. Post components can be used in combination with the system’s wide selection of standard parts. Bases are available for both permanent and portable applications.

Standard finishes for Vista profiles and metal end caps are available in silver or black anodise.

Custom sizes and finishes are available upon request.
Triangular Post Signs

A triangular freestanding sign utilises a short post section and a matching base to support the main triangular directory element. An additional post section is used to set the header apart from the main element.

Vista Posts are available in 4 diameters. The system can be ordered in various heights to accommodate a wide range of application.
Vista Light Post Signs
A single post and base is shown supporting a double-sided Vista Light design.
Sign frames and post heights are adjustable.
It can be used with or without internal illumination.

Vista Light - Post Sign
Easy to read, clear signs, that can be positioned to give maximum information. They blend into the architectural design, while giving information that is simple to understand.
Triangular Pylons

A triangular pylon, using short sections of Vista post extrusions between frame sections to create an attractive way-finding system.

With Vista bespoke signs are affordable. By using standard extrusions and components, custom designs are cost effective. Our staff will assist you in creating the product you need. Assembly is simple, and the only tool required is a screwdriver.

Bases are available for both permanent and portable applications.

Standard finishes for Vista profiles and metal end caps are available in silver or black anodise.

Custom sizes and finishes are available upon request.
Triangular Pylons

Create freestanding, convex triangular pylons using the standard Vista extrusions joined with a series of matching end caps and bases.

This cost effective frame system allows the use of standard substrates such as: plastics, metals, and paper. Create your own graphic signs and then flex and pop them in! When it’s time to change the graphics, just pop them out again with the Vista Key suction cup.

The clear, non-glare lens provided by Vista can be used as a substrate for your vinyl graphics, or placed over printed paper inserts (paper should only be used indoors).

Choose between 21 different widths from 100mm/4” to 1200mm/48”, and can be ordered in various heights to accommodate a wide range of applications.
Vista Light Pylons
This system is used to create freestanding, convex, double sided signs that can be backlit with the addition of interior illumination, or used with standard signs substrates without illumination.

The unique design of the system allows the use of two panels for inserting artwork that needs to be changed out often, such as posters.

Standard finishes for VL.1 and VL.2 profiles are available in silver or black anodise. Standard finishes for VL.3 profile are available in silver paint or black anodise. Choose between black plastic end caps or silver and black anodised aluminium end caps. Custom sizes and finishes are available upon request. Three profiles sizes: VL.1, VL.2, VL.3, are the heart of the system.
Vista Light Pylons

Great for show rooms, lobbies, displays, parking garages, advertising, point of purchase, shopping centres, trade shows etc.

Bases are available for both permanent and portable applications.

This cost effective system is constructed from two special aluminium extrusions, an end cap, face inserts, and a base, for either portable or permanent installation. The only tool needed for assembly is a screwdriver.

The Vista Light sign frames are offered in ten different widths from 250mm/10” to 1200mm/48”.

The system can be ordered in various heights to accommodate a wide range of applications.
C7 - Demonstration Kit

A professional and impressive sample case with eight different sign types, including graphics, the MCFT guidebook and a CD packed with sales and marketing tools to assist you in your presentations. This kit is a must for your next sales call! P/N C7

C8 - Display Panel

Showroom Display Board: An attractive assortment of 8 Vista signs mounted on display board, ready to mount in your show room or lobby. This kit will enable you to show Vista System to your potential customers and add value to your current display area.

Custom Displays

Custom kits and samples are available upon request. Special display kits are available to accommodate your needs and budget. Call for more information.

Promo - Promotional Kit

100 customised samples to hand out to your customers, including the Vista suction tool. The samples are made of V80x3.147\*80mm or V100x2.366x60mm and include personalized graphics to include your company logo and information. There is a detailed label on the back of the sample with your company contact information. This is a great way to market and promote your company, with a practical and useful marketing tool that you leave with potential customers as a calling card.

Samples And Display Kits For The Sign Pro

Why Samples and Display Kits? Professional sales tools are one of the key factors in promoting your business. At Vista System, we have made a special effort to create sales sample kits to fit both your needs and budget. From our experience the most effective sales tool for Vista System is a display of actual signs presented in your business display area. The display kits offered come with changeable inserts, ready for you to provide the graphics of your choice. We encourage you to experiment with different types of inserts to create an interesting and versatile display.
Years from now, you may not be able to remember the precise moment you chose Vista System for your project. However, one thing you will remember: Our promise of reliability, because Vista System is designed to fulfill that promise. Vista System components are built to last and stay worry free.
